Training registry of the Modern Business Services sector

BECOME PART OF THE REGISTER

The Service Register is a place created for everyone who wants to develop themselves, share knowledge or support others in acquiring new skills.

You can join it in several ways – as a training participant, a trainer, a service provider, or an employer.

Nearly 700 different training services from Poland, Cyprus and Italy have already appeared in the Register. It is a dynamically growing database - your offer can also be included in it.

Co-funded by the European Union

>> Visit the Register of Training Services <<

Did you know that...?

As a training provider or employer, more than one employee of your organisation can manage the company profile?

It's true! As a rule, services of this type allow the creation of only one profile per organization, which can be problematic in situations where, for example, the employee managing the company account is on vacation, gets sick, or simply changes jobs.

In the case of our register, we have tried to do it better!

After creating a profile for the organization, you become the administrator of the profile. Other people from your organization can create accounts on the platform under the same profile type (training service provider or employer) and join your organization that already exists in the system (by selecting it from the list of organizations available in the system). To prevent potential misuse, the administrator of the organization's profile must accept the new user's request to join the organization.

We hope this functionality turns out to be useful!

Participant

Register as a user who wants to enroll in training offers

Employer

Register as an employer to enroll employers in training offers

Course Provider

Register as a service provider to enter offers in the MBSS Registry

Trainer

Register as a trainer to conduct trainings and track the progress of your students

☐ I want to register a new Service Provider

☒ I want to join an existing Service Provider

WORKSHOPS TRAINING

ASEV and MARR launch workshop

A workshop on the use of VR tools in the training process is starting in Tuscany on 6 June. The event is organised by the Agenzia per lo Sviluppo Empolese Valdelsa (ASEV), one of the project partners, which will host participants at its headquarters in Empoli, via Piovola.

The workshop will run until 14 July and will include 50 hours of practical activities. It will be attended by 10 participants who will work on the implementation of soft skills training in a virtual reality environment. The project is based on a "learning by doing" approach, so particular emphasis has been placed on exercises and interactive forms of work.

Similar activities are starting in Poland at the same time. On June 9, the Małopolska Regional Development Agency (MARR) will begin its workshops. The sessions will take place at the company's headquarters at 11 Kordylewskiego Street in Kraków and will run until June 30.

Both events are part of a project to develop effective training methods using VR and implement them in various partner countries.

Soon, the remaining partners will also conduct such workshops.

International conferences

ASEV at international conference

'The Future of Education'

ASEV, a partner of the project, will participate in the 15th edition of the international conference "The Future of Education", to be held on 26-27 June 2025 in Florence (Italy).

The project was positively evaluated by the conference's Scientific Committee, which appreciated its innovation and practical application. As a result, the abstract prepared by ASEV has been officially shortlisted for the event's programme.

During the event, the functionalities developed as part of the project will be presented, including modern VR/AR technologies and the training services registry, which is an integral part of the project.

More details about the event can be found on the organiser's website.

Dekaplust will be present at the conference in Nicosia!

Already on 5 June 2025, DEKAPLUS, a partner of the "Training registry of the Modern Business Services sector" project, will participate in the international conference "VR, AR and AI: Role in Higher Education", organised by the Center for Social Innovation (CSI) in Nicosia, Cyprus.

The event is dedicated to the latest trends and the development of digital technologies. The program includes, among other things, presentations by industry leaders on digital transformation and workshops on implementing digital strategies in various sectors.

Participation in the conference fits perfectly with the objectives of our project, which promotes innovative approaches to management and digital transformation in business.
