August 2025

Training registry of the Modern Business Services sector

WHAT'S NEW WITH US?

In the latest issue of our newsletter, we report on the project partners' meeting in Cyprus. We have also prepared a new batch of materials available on our website – there you will find documents that will help you better understand our project, how the VR application works, and the training services register.

We also reveal details about the next stage of the project, namely the upcoming conferences.

We invite you to read on!

Co-funded by the European Union

Meeting of project partners

August 26-27, 2025 r.

We met for the fourth time

This time, the host was Dekaplus

During the two-day meeting, the project partners summarised the results of the workshops and shared their conclusions. The discussions focused mainly on analysing the results achieved so far and finalising the register of services, which is the central tool of the project. All work was based on the findings from the workshops and the results of user acceptance tests (UAT) to ensure maximum functionality and ease of use of the register.

During the meeting, an action plan for the coming months was also agreed upon. The last project meeting will take place in Italy and will be hosted by ASEV. The exact date of the event will be announced soon.

New knowledge base available for download!

We are reaching out to our audience by preparing a large amount of material about our project, VR application, the world of virtual reality, and the training services register. All these documents are now available for download on our website. Among the available materials, you will find, among others:

- an introductory guide to virtual reality in education
- documentation of our VR application
- UAT plan and survey templates
- technical documentation of the training services register.

We hope that this documentation will be useful to other entities and individuals who are implementing (or will implement in the future) similar activities – as part of their own project activities and beyond, contributing to the dissemination and exploitation of our results.

CONFERENCES PROJECTS

The next stage lies ahead of us

We are beginning the next stage of the project, which will focus on promoting the register and exchanging knowledge and experience between industry experts. As part of the planned activities, five thematic conferences will be held, devoted to current issues and challenges facing the sector.

Syntea S.A., as the project leader, will be responsible for organising the international conference. The other project partners will organise national conferences, which will be held locally and will focus on the needs and specificities of individual markets. Thanks to this division, the events will gain both an international and local dimension, which will allow for even wider dissemination of the project and its results.

The dates of the conferences, a detailed schedule and information on participant registration will be published soon.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.
