BRIEFLY ABOUT THE EVENT

Dear Sir/Madam,

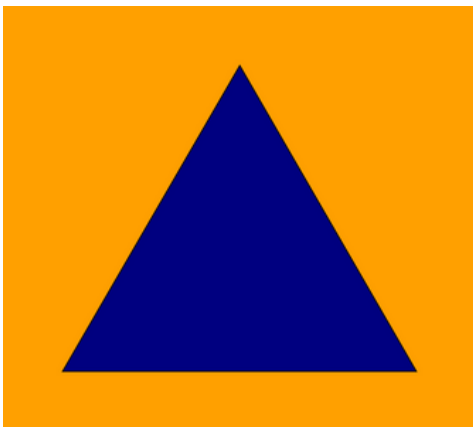

We cordially invite you to participate in an international conference entitled: "Innovative education using micro-credentials and virtual reality in the light of the current challenges faced by the EU," dedicated to modern technologies and education, which will become a unique space for the exchange of experiences and inspiration.

The event summarizes the implementation of the international project "Training registry of the Modern Business Services Sector," which aimed to create a registry of international training courses for the modern business services sector (BSS), promoting innovative VR/AR (virtual/augmented reality) training methods, and facilitating access to micro-qualifications and micro-credentials.

The unstable political situation on the EU's eastern border also forces us to face the challenge of the demand for skills related to the population's ability to respond to crisis situations. The context of civil defence will therefore serve as a basis for discussion on the practical applications of modern technologies in large-scale teaching processes that respond to the real need to react to various threats.

We look forward to meeting you in Lublin!

Participation in the event is free of charge!
