October 2025

Training registry of the Modern Business Services sector

WHAT'S NEW WITH US?

In the latest issue of our newsletter, we invite you to read a summary of the MARR conference, which took place in Krakow.

In this issue, you will also find announcements of upcoming conferences, along with preliminary information about the dates and locations of these events.

We encourage you to read and follow our news!

Co-funded by the European Union

MARR conference

Cracow, Polska

The next stage of the project has commenced

In Krakow, we presented the results

On 21 October, a conference organised by the Małopolska Regional Development Agency S.A. was held at Stara Zajezdnia in Krakow.

The meeting was attended by industry experts who discussed the latest trends and innovative technological solutions supporting the development of the financial and business services sector. One of the key points on the agenda was the presentation of the results of the 'Training registry of the Modern Business Services sector' project. It is a modern, comprehensive platform that supports training processes and collects educational offers from several European countries, facilitating access to high-quality training for companies and institutions.

Paweł Karczmarzyk, Project Manager at Syntea S.A., spoke about the assumptions and functionalities of the Registry, presenting the capabilities of the tool and its potential for use in competence development in the NUB sector.

The atmosphere of the event was conducive to the exchange of knowledge, and the solutions presented showed the directions in which modern education and business support in Europe are heading.

A conference organised by DEKAPLUS will be held in November

On 25 November, Limassol (Cyprus) will host the conference 'Mixed Technologies Revolutionising Professional Training', organised by DEKAPLUS Business Services Ltd. The event is part of a series of conferences disseminating the results of the project.

Participants will have the opportunity to listen to presentations by experts and take part in a panel discussion on the future of vocational education. The discussion will focus, among other things, on the role of technology in competence development, the impact of artificial intelligence on training, and ways of reaching people from different areas with modern education.

The conference programme also includes a presentation on the use of VR tools in training and the potential of mixed technology.

CONFERENCE
IN EMPOLI

We have learned the date of the conference of the next project partner

Agenzia per lo Sviluppo Empolese Valdelsa (ASEV) invites you to a conference summarising the results of the project, which will take place on 25 November in the conference room at Via delle Fiascaie 12 in Empoli.

The event will be an opportunity to present the results of the partners' collaboration. As with the other conferences, the meeting will focus on the central element of the project — the Training Register. The event will discuss its key features, its importance for the industry and its potential applications in the MBS sector.

Detailed information about the event is available at:
